Ableton Live

Ableton Live is a popular digital audio workstation (DAW) known for its real-time performance capabilities, intuitive interface, extensive sound library, and Max for Live integration. Its benefits include:

- 1. **Live Performance**: Ideal for DJs and electronic musicians with its real-time Session View.
- 2. **User-Friendly**: A straightforward interface that minimizes complexity.
- 3. **Rich Sound Library**: Comes with a diverse collection of instruments and effects.
- 4. **MIDI Power**: Offers powerful MIDI control and routing for creativity.
- 5. **Max for Live Integration**: Seamlessly incorporates Max for Live, allowing users to create custom devices and expand functionality.
- 6. **Stability**: Reliable and rarely crashes, suitable for both studio work and live gigs.

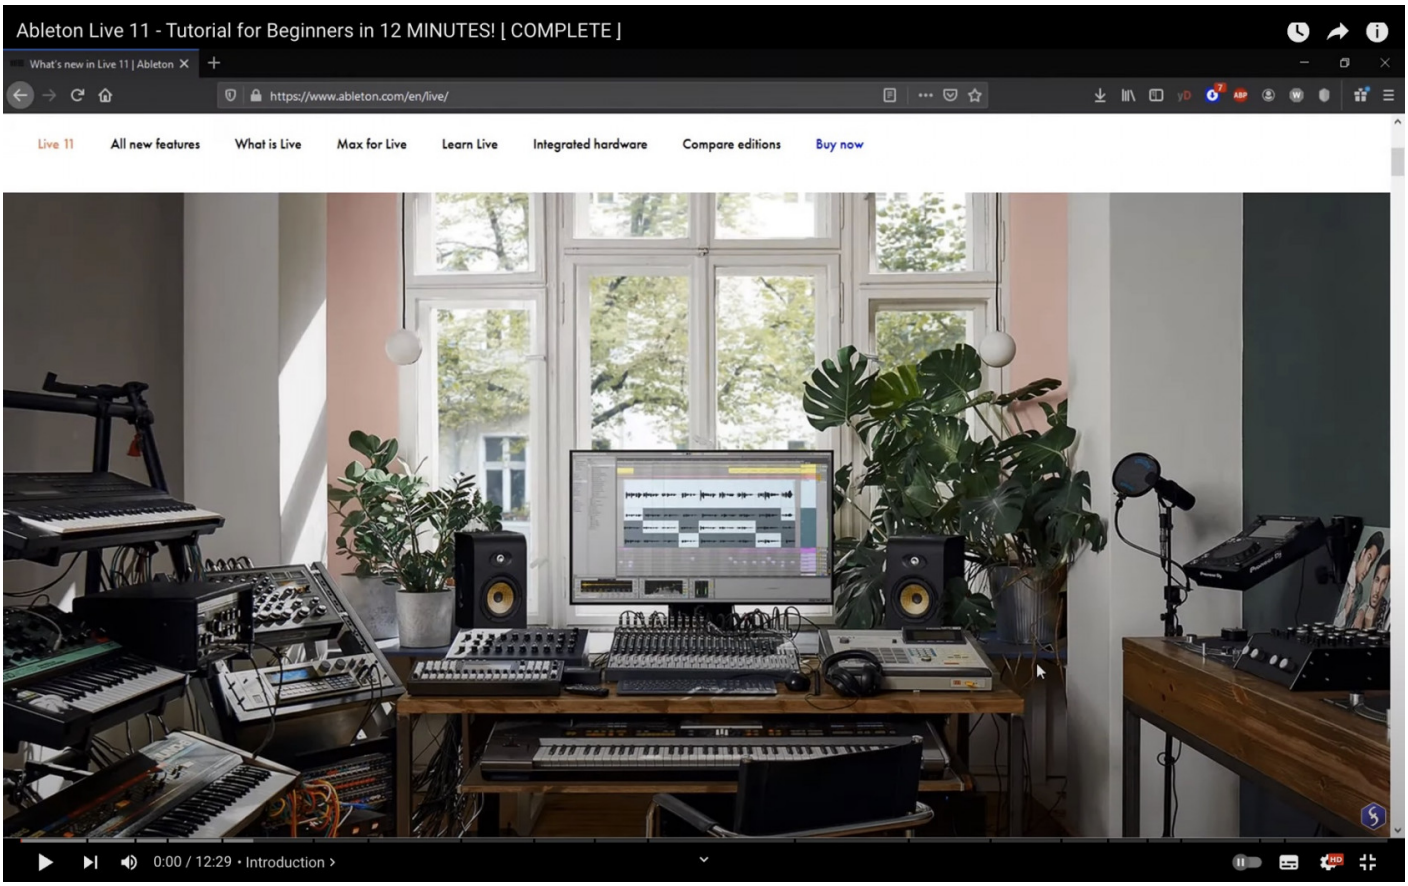

A 30 day trail is available at https://www.ableton.com/en/trial/ or you can buy it with a student or education discount.
Licensed Abelton live is installed & available on most Blackbox workstations for HKU students.

Add this to send OSC from Ableton to any other software
