

Reaper

Reaper is a cost-effective and highly customizable digital audio workstation (DAW) used by musicians, audio professionals and artists. Its key benefits include:

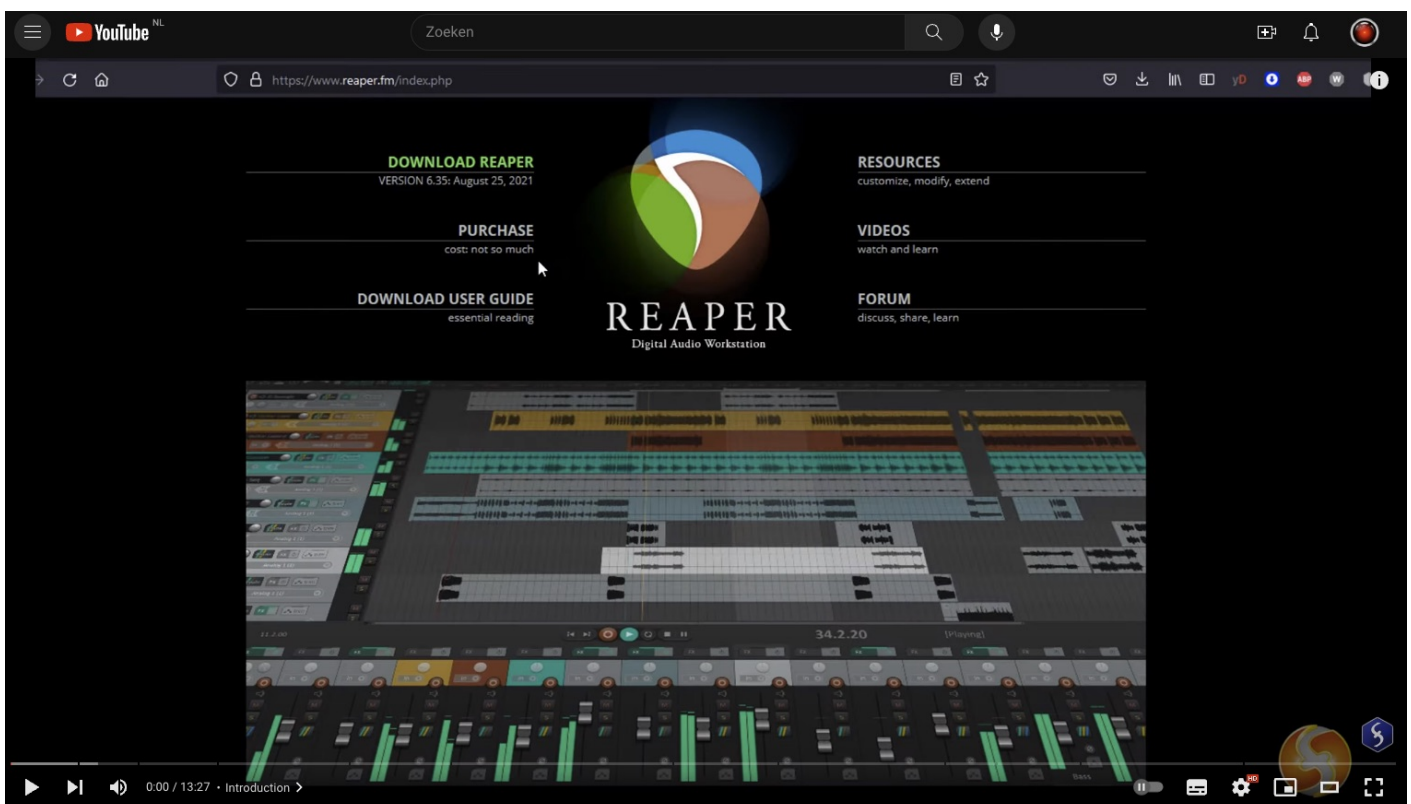

1. **Affordability:** Professional-grade features at a budget-friendly price.
2. **Customizability:** Tailor the software to your workflow with customizable shortcuts and themes.
3. **Efficiency:** Runs smoothly on a wide range of computer setups.
4. **Multitrack Recording:** Excellent for multitrack recording and editing.
5. **Plugin Compatibility:** Seamlessly integrates with third-party VST and AU plugins.
6. **Cross-Platform:** Available for both Windows and macOS.
7. **Active Community:** Access to a vibrant user community and support forums

A 60 day trial is available at <https://www.reaper.fm/> or you can buy discounted license.

(although reaper is worth the license, users have reported the evaluation period to be infinite, so... just try..)
