

How to use the board

Step by step Guide

When getting the DIY soldering kit, first follow the [build and assembly instructions](#).

WELL DONE YOU ARE DONE ASSEMBLING YOUR SYMBIOTIC, NOW YOU SHOULD HAVE SOMETHING VERY SIMILAR TO THIS!

If the device is not working properly, check the try-to-fix-checklist in the document

- ☐ Check the polarity of polarized components such as capacitors, leds etc.
- ☐ 9v battery clip is wired correctly (red generally is +, black is -)
- ☐ Check if your 9v battery is charged!
- ☐ Check the solder points many times, can be a cold or not soldered properly

If all works continue to the next steps...
