

# How to use the board

## Step by step Guide

When getting the DIY soldering kit, first follow the [build and assembly instructions](#).

WELL DONE YOU ARE DONE ASSEMBLING YOUR SYMBIOTIC, NOW YOU SHOULD HAVE SOMETHING VERY SIMILAR TO THIS!

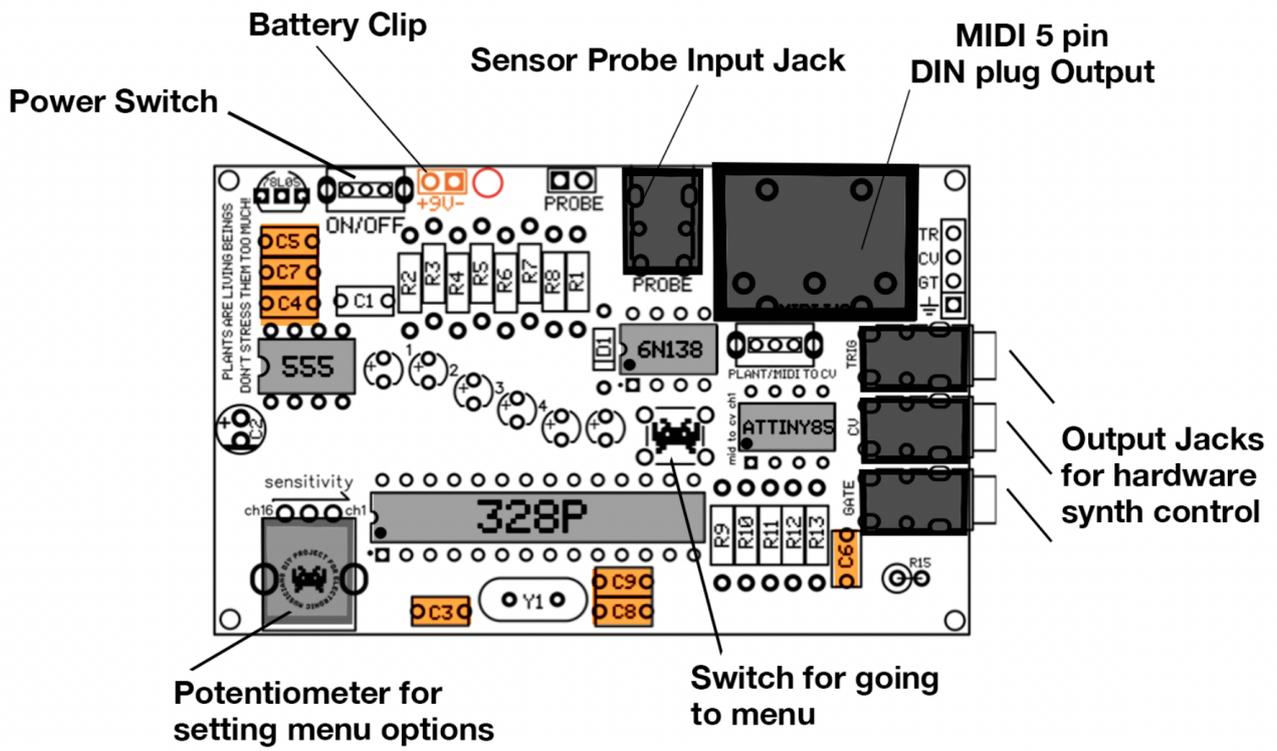

If the device is not working properly, check the try-to-fix-checklist in the document

- Check the polarity of polarized components such as capacitors, leds etc.
- 9v battery clip is wired correctly (red generally is +, black is -)
- Check if your 9v battery is charged!
- Check the solder points many times, can be a cold or not soldered properly

If all works continue to the next steps...
