

General Resources

Here you will find a general list links to different Isadora resources.

Knowledge

- [Isadora Main site](#) (for general info)
- [Isadora Help](#) (many knowledge articles and tutorials)
- [Isadora Forum](#) (ask your question and find answers)
- [Isadora Add-ons](#) (for useractors & plugins)
- [Isadora manual](#) (good for reference)
- [Isadora Instagram](#) (a couple of random tutorials)

Tutorials

- [Isadora 101 tuorials](#)
- [Isadora Guru Tutorials](#)
- [Isadora mini tutorials](#)
- [Isadora Let's built it tutorials](#)

Isadora Workshop/Resources of other people

- [Milton Lim](#)
- [Matthew Ragan](#)
- [Jamie Griffiths](#)

Materials

Isadora patches

- [Isadora Example Patches on Github](#) *These patches are developed to show case different sensors, devices and concepts as discussed in the Isadora lessons*
- [Isadora User Actors on Github](#) *User actors in Isadora are custom selfmade actors that contain other actors think of them as handy little puzzle pieces. To import an user actor right click somewhere in your scene and choose "Place User Actor/Macro.."*
- [Isadora Workshop files on Github](#) *These patches were originally developed for a specific Isadora workshop but give a good overview of different Isadora subjects.*

Isadora Materials

- [Materials for Github repo Examples](#) *This is a zip file with various materials to use in your Isadora projects.*
- [Nextcloud folder with Material](#) *This is a Nextcloud folder with various images, videos and audio*

Stock Materials

For stock materials you can visit [this](#) bookstack page

Video codec information

- [Isadora performance tips](#)
- [Isadora Knowledgebase article on HAP codec](#)
- Encode to HAP:

(Video files with an H.264 codec might freeze when played in Isadora. You can convert your file to an AVI with a HAP codec to solve this issue by following the instruction below)

1: download video conversion software: [Shutterencoder](#)

2: download the codec on this [Github page](#) " HapQuickTimeCodec.Mac.v12.pkg " or " HapQuickTimeCodec.Windows.v12.msi " depending on what system you work with.

3: Install the codec by opening the file you just downloaded. This is a plugin that works within your video software. After installing this you can find the HAP codec in the list of video codecs in your video conversion software (Like Shutterencoder)

4: [Tutorial encode to HAP](#)
