

Layering and Masking

Tutorials

- [Learn Isadora](#)
- [Isadora 101 #14 Layering](#)
- [Isadora 101 #15 Compositing](#)

What is this?

Just like in image editing programs such as Photoshop you can work in Isadora with layering and blend modes. Depending on where the actors are on the scene they will be rendered in different layers. You can also set the layers manually. And in the projector you can set the blending options.

Practice Assignment

Create a composition of different movies using the layers and blending modes. Use the underwater world as theme.
