Sound

Tutorials

- Isadora 101 #5 Sound playback
- Multi channel audio

Tips & Tricks

- You can use both WAV/AIFF or MP3, but MP3's will be played using the movieplayer which works different then the sound player
- With the sound player you can play with speed to get a lot of interesting effects
- With the MP# player you can play sound backwards
- On macOS you have a lot of extra audio actors that are part of core Audio that you do not have on Windows
- You can use the tone generator actor to generate a tone with different frequncies and create effects.
- Do not forget to play with uysing sound as an input! Try the Sound Level Watcher actor, the Sound Frequency watcher actor and the Sound Frequency Bands actor.

Assignment

Make a simple story with sounds only. Hint, use timed triggers and audio speed. Make an audio sequencer? Make Horror story
