

Text

Tutorials

- [Using the Text/ure actor with multiple words](#)

Kinectic type

- [example 01](#)
- [Simple example wonderwall](#)

Tips&Tricks:

- There are many actors who do "something" with text. the "Text Draw" actor is the one to draw text on screen.
- There is a trigger text actor you can use to trigger different pieces of text after each other
- The "value to text" actor is very handy if you want to display some values
- With the Get/POST URL text you can use live sources from the internet.

Practice Assignment

Make a text animation based on the song Wonderwall. Don't forget the possibilities of the Text/ure actor.
