Working with the Wave in Isadora:

Softwave software comes with presets on the left side in the interface. Preset 15 is already set to MIDI with channel 15. Go to Menu > Audio/MIDI settings. Here you can choose MIDI output. When you start Isadora it will show "Isadora Virtual In"

In Isadora you receive MIDI by setting your input channel in the Communications > Midi Setup window

Input ports:

Port 1: Wave

Use the Actor Control Watcher: Set Controller to the number of the channel you send MIDI to from Softwave. Like channel 15.

In Softwave you can make your own presets and choose your own channel numbers.
Make a new preset by clicking + next to "Default Preset Blank" at the top of the presets list.
Choose "add function" and a function. In the bottom right of the new function press the MIDI icon >
CC to choose a channel like 3.
In Isadora change your control watcher controller channel to 3 to receive the values.

Sometimes Isadora loses communication to the Wave, go to midi setup window change the port to none and choose wave again. Connection should be back.
